OFFICE OF RESEARCH AND DEVELOPMENT

ORD is charged with applying state-of-the-art technologies and methodologies to effect improvements in intelligence collection, analysis, and operations. We will report on significant progress achieved in applying emerging technologies to intelligence problems and notable events related to ORD's support to the Moscow Embassy security program.

Seminar Series

The Office of Research and Development has initiated a series of Agency-wide seminars to familiarize interested officers with new technologies and their application to intelligence problems. The major theme of the seminars will focus on enhancing the awareness of our Agency personnel to technology development throughout the Agency in today's environment. Each seminar will include a tutorial to establish the problem and identify the technology; discussion of ongoing research; and how the expected results will be used.

In May we hosted a symposium related to the Soviet armor program. Discussions focused on our current intelligence requirements and specific technical approaches to satisfy them. Representatives from the DIA, U.S. Army, DARPA, Ballistic Research Laboratories and industry spoke at the symposium, which was also attended by representatives from the U.S. Air Force.

Our June seminar was on the basic principles of Synthetic Aperture Radar (SAR) and, in particular, on a form of SAR data, as it exists before an image is made of it, called the doppler phase history.

The following are candidate titles for future seminars:

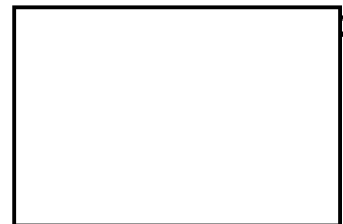

<u>Date</u>	<u>Title</u>	<u>Author</u>
August 1982	Use of Evidence in Intelligence Analysis	
September 1982	Intelligence Applications of Knowledge Based Systems	
October 1982	Techniques for Large-Scale Modeling	
November 1982	Intelligence Uses of Remote Sensing	
December 1982	The Theoretical Quantam Mechanical Observer Effect - Affect on Intel- ligence Analysts?

FOREIGN BROADCAST INFORMATION SERVICE

FBIS is engaged in monitoring Korean public media worldwide.

25X1

Cuban Activities

FBIS has been asked to participate in the Active Measures Subgroup on Cuba which has been established at State/INR to develop counter-measures to anti-U.S. propaganda emanating from Cuba. State said FBIS was the main source of information on what Cuba is saying about the United States. The monthly meetings will be attended by an officer from the FBIS Analysis Group.
